

PROPOSAL BY ICELAND AND NORWAY ON TERMS OF REFERENCE FOR PECCOE

Accurate reporting of catches and fishing effort is a key in the overall management. The Scheme of Control and Enforcement contains detailed provisions, but experiences gained shows that the implementation needs to be far more effective. PECCOE shall review the implementation and the transmission of data from FMCs to the NEAFC database in particular.

The Secretariat should play a proactive role in the work to improve the implementation and PECCOE shall develop the necessary guidelines.
